This product contains variety of raw materials  
that have certificate of Environment

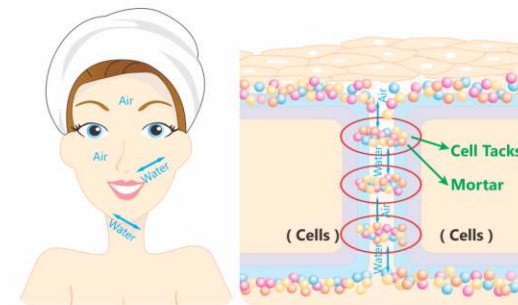

And Organic

The most important first step in the process of skin care is cleansing. But many people do not know that choosing facial cleanser is so important. Skin pH is weak acidic. If using alkaline soap or strong surfactant, though skin will look clean and white immediately (soap has very strong cleaning function), but will cause serious harmful (coarsen) to the skin! Good cleanser must natural and effectively cleans dirt, will not harm the skin and cell tacks. After thorough research and hard work, 'Skin Guard' expert researchers had successful produce a facial cleanser that suitable for all type of skin – **Natural Seaweed Facial Cleanser**.

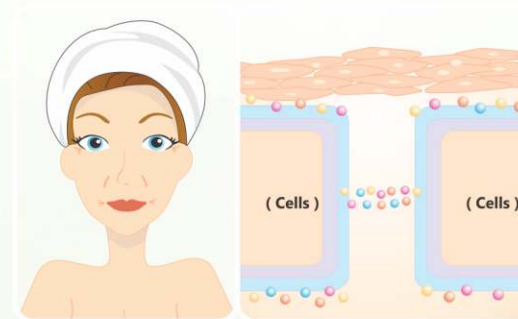

Many cleansing products on the market are using surfactant (cleansing agent) that made from petroleum by-products. Surfactant that used in this product is extracted from coconut oil, corn and palm oil. The unique gently formula not only can effectively clean the face, would also not cause inflammation and skin injure. Suitable for daily uses, containing seaweed extract, hydrolyzed wheat protein, chamomile extract and high moisturizing elements that help skin healthy. Even after wash, toner did not needed the skin will also look fresh and beautiful.

Skin barrier is shaped like a wall that form from bricks and mortar.

Bricks = Skin cells  
Mortar = Ceramide, Fatty Acids  
Cell Tacks= Cholesterol, Collagen

Elements cells (mortar) is like the chain of skin cells that tightly bound together, so that the skin smooth and soft.

Due to daily activities, dust and dirt will stick on the skin. Therefore, the main skin care products is facial cleanser. But most facial cleansers and soaps on the market have very powerful cleaner ability, causing the good cell elements will also be removed, the skin cell chains will become loose, easily lost moisture, the skin will become dry, greasy and gross! For skin care, you must use whole plant surfactant formula, gently cleansing and not harm the skin!

**Direction:** Wash your hands, put few drops facial cleanser onto palm, fine lather, massage evenly over the wet face especially the forehead, nose edges, chin and then rinse with lukewarm water.

**Tips:** Wash your face with warm water is the best way, this not only can unsure fully open the pores, the skin's moisturizing oil also will not lose after over cleaning. Toner usually contain alcohol, detergent and no practical effect. Use the Natural Water Hydrating Essence after clean the face.
