“ Using Multiple Amazing Penetration Mechanisms, Lock The Moisture, Maintain Skin Elasticity and Firming, Soft And Comfortable Touched Whole The Day ”

Healthy skin surface should have a 12% – 15% water, but if lack of water, the skin will become dry, small wrinkles will appear. Want your skin softer, smoother, firmer when be touched and a cheerful and youthful appearance? The first step of skin care is retain the moisturizing! But many people may not know that, retain moisture and increase humidity are two different concepts. Moisture will form a protective layer on skin surface to prevent moisture loss, but this does not solve the water shortage problem in the skin. Increasing humidity is needed by the cells directly can get into the skin internally and integrated fully with dry cells and improve the micro – circulation of cells and refresh the skin. The right system is to add and maintain the moisture. After thorough research and hard work, 'Skin Guard' expert research had successfully produced a unique moisture retentive and increase moisture product – **Natural Rose Water Hydrating Essence.**
