Repay The Rear From  
Parents To Them**

**Better Health, Better Life**

Colostrum is known as **The King of Natural Immunity**, it also known as the "**First Food**" for the humans.

Immune globulin **G (Ig – G)** Colostrum is **50 – 100** times of colostrum human and **250** times of normal cow's milk.

**Colostrum is a very valuable food.** The most better Colostrum choice necessarily must be imported from **New Zealand**.

Reason: Best pasture, under mild and balmy climate, control and care of neat farms has enabled New Zealand fame in international, New Zealand cows colostrum is healthy secure.

**Now, New Zealand is a country that is exempt from foot and mouth disease in the world.**

Nutrition Center of Cambridge England found that, if newborn baby could be given mother's milk in time, when reach the age of 8, increase of his IQ and healthy will clearly been seem compared with same age child that only be given normal milk. In the event of the child who not been given mother's milk they will not perfect when having various diseases, such as: such as respiratory infections nerves, asthma, inflammatory lung disease and other types of allergic diseases. In fact, in the middle and old age is more easier to get diabetes, cancer and other diseases.

### **The groups that need globulin for immune factor that from Colostrum:**

**Baby ( After 6 Months ), Pregnant Women, Elderly, Diabetics, Adult Cardiovascular Patients, After Surgery And Burn Patients, Cancer And Disease, Convalescing Patients, Emotion Patients ( The Person Who Is Sick ), Peoples Of Beauty – Conscious.**

## Colostrum Basic Resources

According to the historical records, the use of colostrum by human is far ahead of all the studies on it. As early as several thousand years ago, the use of colostrum was started in India. Colostrum is considered as a leading food among Hindus. It is also a traditional food of their hereditary. Colostrum has been included in the list of vegetarian diet food for the spirit of Indian leaders, Rishis. In Northern Europe the Scandinavian area, nearly hundreds of years they use Colostrum to make honey pudding to celebrate the birth of the calf, to pray for the health of every person. At the end of the eighteenth century, scientific studies have found that the use of colostrum is to turn a new birth and keep it growing. Afterwards, the study of colostrum is going on. In America and other regions of the world, the use of colostrum is as an element of immune (antibiotic) are strongly encouraged before getting the inventive medicine or antibiotic. At the earlier of the century 1950s, colostrum had widely used as a medication for arthritis. Due to very limited resources and colostrum is not easy to keep for long time, then in India, Europe and America, only high classes people have the opportunity to enjoy it only. Therefore, the introduction of the public to the colostrum is very limited.

According to the Doctor Bernard Jensen [ 2 ]s book, expressing to wonder and the function of colostrum is to protect or restore the body's immunity to ensure the health, and therefore the subsequent colostrum also attracted public attention.

## Immune Globulin, Ig-G

Immune globulin, Ig-G ( antibodies, also known as globulin -  $\gamma$  cells based on it's basically sources ) is very effective for the prevention of germs. Ig-G is the most important immune globulin in Colostrum. It is globulin chain that formed by hundreds of thousands of amino acids. It can dissolve in salt water, but not in water. In normal conditions, the rate of Ig-G globulin is 45% higher than the serum globulin in the blood. Immune globulin or antibodies that are found in all animals, including the human body is divided into 5 types; start with abbreviated name called as Ig, followed by the letters of the alphabet ( A, D, E, G and M ). Ig-G in colostrum is 50 ~ 100 times higher than the beginning of human breast milk, and 250 times more than regular milk. The main functions: control and increase the immune system, resistance and eliminate harmful invaders to the human body ( including: viruses, bacteria and toxins ) are also perfect immunity for the baby.

## Lactoferrin-LF

Lactoferrin-LF is the most powerful of defense against germs and swelling / inflammation viruses. In nature, it can only be found in colostrum and breast milk. It works as a barrier to the growth of the virus, the ecological renovation of germs in the gut; stimulate the growth of beneficial bacteria (bacillus). Adding iron absorption to 5 ~ 7 times higher, prevent anemia. The main function of Lactoferrin-LF is its ability to combine with iron and iron release. Germs need iron material to reproduce, Lactoferrin-LF can penetrate cells and grazing iron substances to prevent bacteria growth and releasing iron into the red cell substances. The main action of iron substances is as a supplier oxygen to body cells. Lactoferrin-LF can withstand various types of germs and viruses. It also is a powerful antioxidant and free radical capable of preventing. Recent research tells that, Lactoferrin-LF contains an anti-inflammatory molecule, sight obstruction can be relieved; stronger resistance to bacteria; barrier active viruses, AIDS toxins, chronic fatigue syndrome and others, a good impact on disease and Autism and illness on injury brain.

### Proline-Rich polypeptide, PRP

It been given the name because it is rich in a type of sour ammonia (22%), whose main function is to control the physiological activity of the immune system center of chest gland, coordinating the immune system that too active or dummy, helps relieve disease. It is an important symbol that can be found in colostrum, can help to adjust the chest gland secretions, and the main function of chest gland is responsible for balancing the immune system. Studies of medicine stated: PRP effective for balancing the immune system that too active (self-attacking immune events as a result of too much production of antibodies) and stimulates the immune system is less active. PRP encourage breast gland function properly.

### Insulin – Like Growth Factor - IGF

IGF got its name because its function is similar to insulin. Its main function is as follows: control metabolism of protein and sugar in human body, can be used as a substitute for insulin, prevention and treatment to control blood sugar elevation, cardiovascular disease and others; helping combination of DHA and RNA, slow down the aging; stimulate the cells, organizational growth, additional push the bones and muscles reluctant, wounds heal faster. Bio – active IGF-1 accelerate the growth of T cell. IGF-1 also may consider (advantages / disadvantages of blood sugar), reduces insulin demand, stimulate the growth of muscle (muscle-building benefits) block or slow down the metabolic decomposition and help in the breakdown of fat, energy supply. Believed that can boost the brain power control, sensitive power of brain efficiency and comfort. Currently, studies and reports on the world of growth factors found in colostrum is very broad. Deterioration of barrier growth factors in the body due to increased age, now with impressions of cheese tactics DNA hormone profiling, identification of growth factors as therapeutic substitutes IGF-1 and GH, is already being used for the prevention and treatment of AIDS, but the price is very expensive.

### Other Factors Immunity

Immune factors that found in colostrum are various of contents. In 1994, a study of colostrum immunity by specialist doctors reported

that colostrum contains various grafting material factors that very effective immunity to the human body (immune factors – IgG, IgM, IgA and IgE, IgA secretion types, IgA additional substance to the merger IgA, type B globulin,  $\alpha$  1,  $\alpha$  2,  $\beta$  2,  $\alpha$  2-AP sugars, enzymes globulin 3, 4 and limping serum). The superiority of immune factors in colostrum is the most perfect and can not be replaced by medications.

### White Cell

White cells promote the production of antibiotics to prevent and slow the growth of viral diseases from penetrating the surface of cells.

### Enzyme

Anti acid will kill the germs and viruses when they meet him. Available in sweat, saliva and tears. Recent years it is included in infant milk formula to stimulate the baby's immunity.

### Value of Colostrum

As well known, a new born baby is through <first food> to form immunity system, the precious liquid be issued within 48 hours by a pregnant woman named as Colostrum. This liquid is not only rich with Physiology Active Factors, meanwhile it also contains organic nutrients and perfectly balanced as: natural organic calcium, minerals, vitamins and other minerals that can balance organic mix in the body.

Now we have stepped into the 21st century, we not only can find various type advantages of early mother's milk, it is also derived from bovine colostrum. Research has shown that colostrum from cows better and more effective compared to early human milk, while it also contains immune factors and naturally grown factors. Therefore, colostrum is very suitable for people of all ages. Therefore,

to ensure your health, you have to make the right choices and healthy, start from the daily diet, and then avoid waste toxins out from the body. This is the purpose of Colostrum (Bovine Colostrum) market.

### Highly Valuable Colostrum

In Colostrum contains Beta Carotene, it has lots of protein and more concentrated, it contains all the nutrients substances that needs by newborn baby, it is suitable for digestion, digestive and utilization of a new born baby.

Many research scientists indicate that colostrum contains immune Vitamin C to help fight against bacteria, especially the first day to the third day colostrum is the most concentrated, it has the functions to prevent the disease in its early stages. Colostrum contain Vitamin E, the content is 3 times more than mature milk, it can prevent the baby from illness Anemia.

Colostrum also contains vitamins that can enhance the development of the nerves in the brain and thoughts, protect the vision and improve the metabolism of bile. Colostrum is rich in fluid secretion which produced by the Immune Globulin G, it is not in regular milk.

Global Immunity G can resist germs and bacillus that are in the food channel and besides that it also can protect the food channel and respiratory systems so that will not attacked by bacteria, prevention of newborn babies from diarrheas, pneumonia disease and related disorders of the respiratory tract. Immune Globulin G only able to be produced by the baby after the baby was born four months.

In colostrum contained active cells, it is 250 times more than mature milk, it has a strong ability to kill germs. There are anti – Candida albicans causes thrush newborn, other germs in the mouth and other harmful bacteria, it has a function to protect newborns babies from being infected by the disease. Infants that been feeding colostrum

such as been vaccinated the natural antibodies. Colostrum is the most suitable for newborns babies, the latest science, the most ideal food. Its functions can not be replaced by regular milk.

### Colostrum - Replacement For Mother's Early Milk

In order to overcome the problems encountered in medicine, the World Health Organization welcomes the importance of colostrum. Colostrum is the perfect food gifted by nature over millions of years of change, the merger between nutrient content and activation substances has reached perfection.

Studies have indicated: the lack of mother's milk to the baby especially the mother's early milk can result in poor child's body strength, more susceptible to a myriad of diseases, the risk of heart diseases, cancer and other diseases is 10 times higher than the normal people.

Cambridge Nutrition Center of England found, if newborns could be given the mother's early milk, then at the age of 8, IQ levels and health clearly been seem than other children that same age with him that just been giving normal milk. In the event of a child who was not given the mother's milk will not be perfect when experiencing puberty, and easy to suffered with a variety of diseases, such as respiratory infections nerves, asthma, inflammatory lung disease and other types of allergic diseases. In fact, in the middle and old age is more convenient diabetes, cancer and other diseases.

Therefore, for the important of children's health, as a mother you should give the early milk to their babies. With the early milk of the 72 hours as an ingredient, with the Bio – technology process after freeze drying – anhydrous, original content in the production of colostrum powder is retained. Colostrum contains protein up to 45%, particularly Immune Globulin, secure exceed 1%, and contains 19 amino acids, 7 types of growth factors, also the ingredients needed by the human body, especially children who were growing up, such as: iron, zinc, chromium, calcium and others.

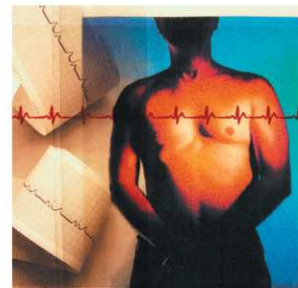

## Colostrum Can Improve Digestive Function

Stomach and intestines in the human body is an organ in the digestive system which frequent exposure or contact with external elements. Especially the intestines, lungs and vessels diet that plays an important role on the health of the body. In addition, the state organs to directly will affect one's health.

Adhesive membrane plays a role in barrier the disease which the virus is easy to multiply and spread. All food will be digested and absorbed through the mouth, then the chances of infection even be much higher . If the membrane is damaged, then when the virus passes through will continue to have an adverse impact to the antibody, directly threatened the health of the body. Studies found that, if can take care of the hygiene or eliminate waste in the intestine, can prevent more than 80% of the disease occurs. Therefore, before confronting the disease, it is good to take care about the hygiene of stomach and intestines.

Colostrum contains immune and growth factors that are very valuable, always consume not only can add the nutrients substances that needed, it can also coordinate the growth of beneficial bacteria in the stomach and intestines, reducing the danger of viruses is very important to the immune system.

Colostrum can provide protection immune that is required by the human body, the active factors in colostrum such as; Immune Globulin factor, Lactoferrin factor, Lf and others clear the virus toxins, stimulate the growth of beneficial bacteria (L-bifidus) and absorption of nutrients, reduces stomach flatulence, both to eliminate inflammation, accelerate healing of ulcers, ease the burden of the immune system in the body more effective defense against viruses that carry the disease. Overseas research scientific

has made the study of L-Bifidus bacteria and found that colostrum can control L-Bifidus well, preventing stomach ulcers and other diseases. In addition, through the protection of colostrum on the intestinal immune system can release to protect the body against viruses, toxins and infections.

## Immunity That Need Globulin Factor Immune From COLOSTRUM

### Baby - After 6 Months

Because the baby's immature immune system, it has to seek help from outside to boost the immunity. Medical studies indicate, defense antibodies factor – IgG is the only one that can be given through the mother milk to newborns, but this defense factor will disappear after 6 months. These antibodies will cause the baby weak, until its own immune system matures at the age of 12. Thus, the term is appropriate given the suitable additional immune globulin to the baby in which it can help defend against infection, strengthen the bone growth of the baby and the baby growth.

### Pregnant Women

Colostrum intake will strengthen the mother's body when pregnant, reducing the chance of infection, giving protection to the baby in the mother's womb. IgG in colostrum and other immune factors, beside than self-defense by the body against many diseases, it can also be absorbed by the baby in womb to get the natural immunity, and become a healthier baby. Consume Colostrum by mother after childbirth can help the wound when delivery recover faster. Body will become more healthier and stronger.

### Elderly

Elderly who always consume colostrum can slow down the body functions from deteriorate, additional

of the depleting immune system for long – lasting health of body and age. According to medical studies say that the immune system of the human body will become more vulnerable when increased from age 56 and so on, the body will be a lack of immune globulin factor. Globulin immune factors that found in elderly people left only 30% – 50% compared with when young, therefore more easily attacked by the virus, so the chance of infection also increases. Colostrum which is rich with growth factors and IgG factors and other immune globulin can strengthen the body, stimulating metabolism and cell growth, provide health, especially for elderly who normally would feel pain in bones and joints is very good.

### Patients With Diabetes

Colostrum contains control blood sugar globulin that can effectively control the flow of blood sugar of the diabetics, with medical effects, enhance the immunity, speed up recovery. Diabetes is a type of disease caused by an unknown metabolic secretion. Because the colostrum contains glucose factors that required by insulin operators in normal conditions, it can help diabetics from insulin injections to prevent the number of accommodation glucose, colostrum is a supplement that is suitable for diabetics.

### Adult Cardiovascular Patients

Colostrum can give the prevention impact on and well cardiovascular treatment. It is rich with the antibodies that can eliminate harmful germs, clean and improving the alkaline in bowel, reduces the absorption of foreign fat, can lower the cholesterol and fats in the blood.

### Patients After Surgery And Burn

By consuming colostrum can boost immunity, reduce the chance of infection, and the types of regrowth factors can accelerate wound healing.

## Cancer And Disease

Studies found that the conversion factor that in colostrum can block cancer cells from spreading, colostrum has the function of effectively prevent the cancer diseases that cause by lack of immunity. This blocking activity will not have toxic and does not cause side effects. Rich growth factor content can be directly absorbed by the body to promote healing wounds.

## Patients That Just Recovered

Patients just recovered from illness and medical torture, pain after the surgery, weak body and weakened immune systems. So by consume colostrum that containing active factors, growth factors, immune factors, will improve the immune system that is not perfect and in addition to speed up the recovery of health.

## Emotional Patients (The Less Healthy People)

Emotional disease is the typically disease that experienced by the people in the town, the main symptom is always fell no energy, no enthusiasm, headache, dizziness. Thus, apart from modifying the work and life habits, consume the colostrum to increase immunity.

## Those Who Beauty – Conscious

Colostrum contains growth factors, conversion regenerate factors, types of insulin factors and other factors that could renew the cell growth and activates the metabolism. Colostrum is rich with immune factors and natural growth that can also preserve the stability of the interior as well as stimulate the detoxification system, giving a good impression of beauty. Consume colostrum for the long time can slow down aging and always seem young!

## Question That Often Been Asked

### What Is Colostrum ?

Colostrum is not milk !

Colostrum is the pre-milk fluid production by all mammals immediately after delivery.

Colostrum not only contains a physiologically active factor, while it has the most perfect organic nutrients in the world, such as: natural calcium, organic vitamins and minerals and so on. Thus, from the past until today colostrum is still used as a "natural start food". Colostrum has been shown not only can take care the health, but also as a multiple ingredient from one generation to others.

### Why Colostrum So Important ?

Colostrum is the first food for newborns. It is not only rich with nutrients, but also contains immune factors for the baby, which can provide protective immunity to the baby free from the threat of dangerous environments. It also contains activation substances that can stimulate the growth of muscle (growth factors and white blood cells). The importance of the role of immunity via colostrum should be able to be proved there by animals such as horses, cows, goats, sheep. These animals after birth, if not get colostrum within 24 hours, the chances of survival are low. (Some reports said the death rate is 25%).

### How To Work ?

The main functions in the body of the new born baby is from mother to baby through delivery form immunity. Mother then through the delivery process sends the complete antibodies (group of immunity) for the next generations. Examples of such people and the orang utan , the baby will receive some immunity from the mother while in the womb. Animals like (horses, cows, and sheep) that can not sent to its immunity during pregnancy necessarily get antibodies through the colostrum within a few days after birth.

### Why Choosing Cows' Colostrum ?

Cows' colostrum is the best. Although all mammals produce colostrum, but by reason of the stability quantity, its processes feature and range of values that can be found in cows' colostrum, so it is the preferred choice. The most important is that it can be accepted by all without any harmful side effects.

### Is Colostrum Safe ?

According to records of the use and safety of colostrum is safe and reliable. Colostrum is a natural food that can be eaten without limitations. Apart from the production and dairy consumption can be trusted, security control and its wealth nutritional also well known.

### Why Choosing Colostrum From New Zealand ?

New Zealand cows colostrum that healthy native grassland blister is the best and secure. Control and care of New Zealand farms under temperate climate and air temperature most suitable have getting a good name internationally. Only raw cow colostrum from New Zealand pasture is able to guarantee a special high antibody content. Place making New Zealand supply high quality colostrum production dairy is the most prominent around the world. Laboratory and production equipment consent by International Quality Auditor and ISO 9001 Standard.

### How Much Colostrum Should I Consume ?

Recommended that consume 15g – 30g with an empty stomach every morning. If you are injured or in recovery condition, you can eat more doses. If you are experiencing stress or being old can eat more every day. If you feel flu – fever or infection, you can double the intake of colostrum to relieve symptoms of pain and accelerate recovery.

### Can Children Take Colostrum ?

Very suitable! Colostrum stimulates the growth of growing up children. From increased focused attention energy to strengthening the memory, preventing the children not to be susceptible to the disease or the flu when they play with other school children.

### Can Pregnant Women Take Colostrum ?

Colostrum is certainly not detrimental to you and your child. You can ask the advice of a doctor. Colostrum can help balance the immune system and digestive system, improve the physiological changes that you encounter at the time of pregnancy, while it also provides sufficient organic nutrients for you and your child. Consume Colostrum continuously until the delivery is very good, you will recover faster and healthier, in addition you could slimming!

### How Colostrum Work To Slow Down The Aging ?

Colostrum will work with your body, combined with the use of natural ingredients thoroughly in order to correct the metabolic system in your body so that you are always in a state of overall health and long life.

### I'm A Vegetarian, Can I Take Colostrum?

Colostrum not an animal or a plant. Are we able to own cows to produce colostrum? To keep them safe and healthy life. Natural earth makes colostrum as the first food for all living things. To date, colostrum is still the most perfect food. Finally, your choice is up at all of your own views.

## What's The Different Between Colostrum And Ordinary Milk ?

Colostrum not only contains all the special content in milk, besides that it has a lot of defensive immune globulin factor which can disease resistance, typical named as growth factors and immunity (Ig-G, Ig-M, Ig-A, Ig-D, Ig-E, IGF-1, IGF-2, TGF-B1 & B2, PRP, LF, LP). Guaranteed safe to eat even for people who do not eat solid sugar globulin.

## Comparison Colostrum With Supplements Or Medicine. What The Functions ?

Colostrum actually helps your body to adjust absorption function regardless of whatever you eat or drink, whether in liquid, medication or food supplement nutrients, all of which can be digested and absorbed. This gives you even more benefit you will feel the body can have more nutrients. You do not need to eat a lot of food as usual.

### What Is Immune Globulin (Ig-G)?

Immune Globulin, Ig-G (antibodies, also called basic resources – globulin- $\gamma$  cells) is a strong effect of defense for germs. Ig-G is the most important Immune Globulin in colostrum. It is globulin chain formed by hundreds of thousands of amino acids. It may melt in salt water, but do not melt in the water. In normal conditions, the rate of Ig-G globulin is more than 45% compared with the serum globulin. Immune globulin – antibodies that are found in all animals, including the human body is divided into 5 types; beginning with abbreviated name Ig, and follow by the alphabet letters (A, D, E, G and M). Ig-G in colostrum is 50 ~ 100 times more than the initial human milk, and 250 times more than regular milk. The main functions: control and increase the immune system, resistance and eliminate sloppy dangerous to the human body (including: viruses, bacteria and toxins); immunity to young children become the perfect baby.

### What Is Antibodies?

Antibodies are special molecules that produced by the immune system. While the body is threatened or attacked by a virus disease, the immune system immediately will act to produce antibodies. The most special function is it given direction, a group of antibodies will act to counter or alleviate conditions.

### What Is Transfer Factor Immune?

For all living mammals, through the mother's immune transfer factor will amend group antibody to the baby. For newborns, it can preserve them and provide defense not to attack from disease until the maturity self – sufficient immune system.

### What Is The Immune System?

Immune system is the body's natural defenses, the body requires this system to fight with the viruses and diseases. It can be divided into two types of systems that function of the natural immune system and adaptive knowledge system.

### What Natural Immune System?

This is the "First Line of Defense", in which the main role is to fight the infection and pathogenic microorganisms. This is contrary to the typical reaction, proven effective against many infections. The skin is part of the innate immune system, which serves as a deterrent and defense against infection that most substrates.

### What Is The Adaptive Immune System?

Adaptive immune system will react specifically against the infection. This reaction will form the antibodies, to fight against substrate invasion counterintuitive. One of the adaptive immune system feature that very important is that it relates to memory, it will keep the same role in the invasion or infected material to resist, from childhood diseases such as chicken pox, measles and mumps, we can see the importance of this factor memory. In order to deal with them, the adaptive immune system is infected, and produce their life-long immunity.

**Better Health, Better Life**

**MR GUA KEAN GUAN AGE : 62 STROKE PATIENT**

In 1999 I had a serious stroke and been sent to the Ipoh Specialist Hospital for treatment. After 2 time been given emergency treatment I still can awake. When the time I wake up also I can't talk and Hemiplegia. The doctor then sent me to the ICU for therapeutic care. After get the approval from the doctor, I was given the NewCo9 Colostrum every day. 10 days later, my condition suddenly improve, and changed from ICU to the normal ward. At the second week after being examined by the doctor, found that my body organ had recover well, wound also recover fast, the doctor also feel very impressive on the good development of my health. Other stroke patients also very interest with the good improvement of mine and my son shared the real story about the Colostrum benefits. At the third week, the doctor let me go home. Up to year 2003 in an accident cause my left leg thigh bone broken. Thank God after 2 months later I was able to walk again as usual. Until today my body still in good health, long been gastric pain also relief. Now when my friends visit me, I will shared the NewCo9 Colostrum to them for health care. Every day I will still take 3 glasses of Colostrum and 2 capsules of Colostrum Booster. I will shared this testimonial is hoped that more stroke patients and other patients, may also get a healthy life through consumption of Colostrum.

**<Letter Dated: 25hb November 2006>**

**Aunty Tan Age : 58 Symptoms of Women Menopause, Joints Pain**
